Metamask Setup Tutorial

TFC Services Inc.

Step 1. Install and set up Metamask

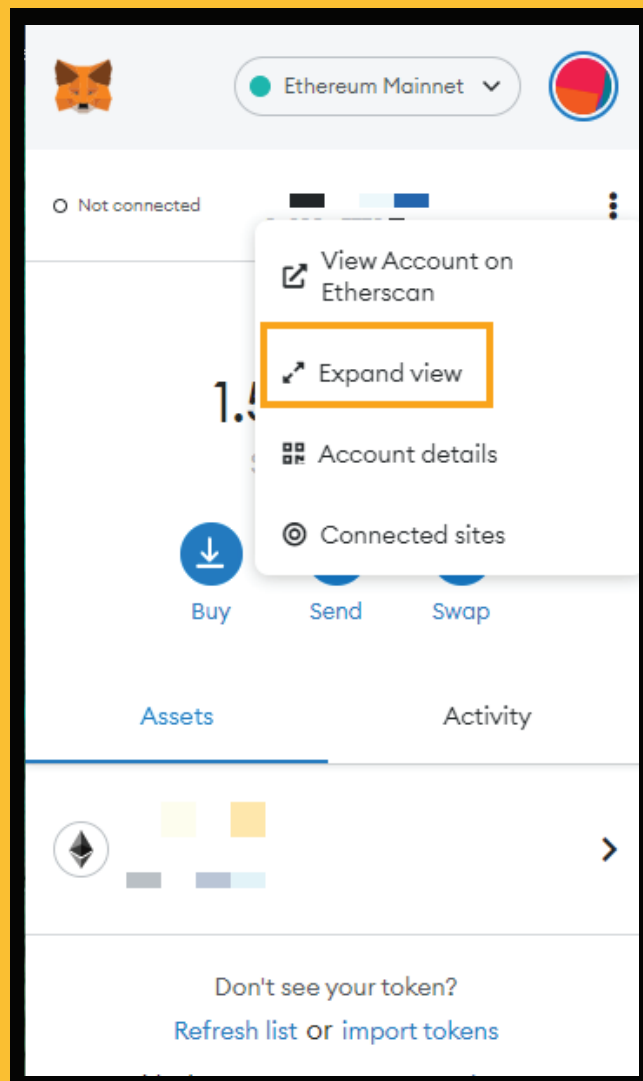

Go to <https://metamask.io/download/> and download your version of Metamask.

Be sure to set up and store your 12-word seed phrase.

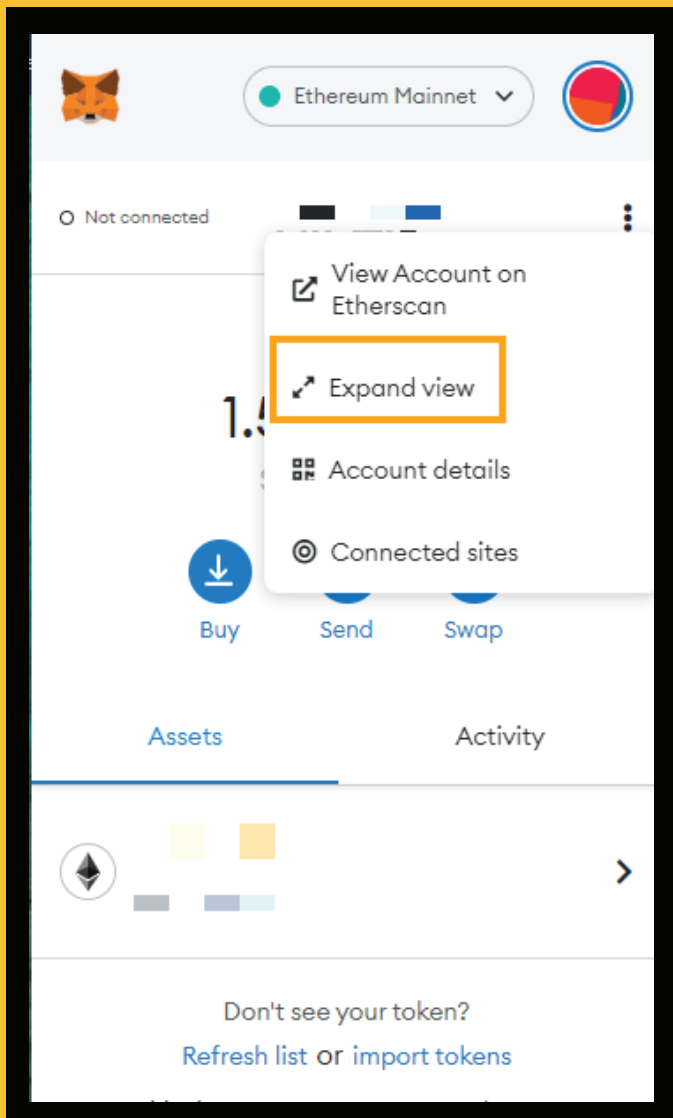

Step 2. Install the BNB Chain Network

Open the Web Extension, click on the 3 dots and then select the Expand View option so the web extension does not close with every tab change.

Step 3.

Then select the add network option.

A screenshot of the 'Add Network' form in the Metamask mobile application. The form fields are: 'Network Name' (Smart Chain), 'New RPC URL' (https://bsc-dataseed.binance.org/), 'Chain ID' (56), 'Currency Symbol' (BNB), and 'Block Explorer URL (Optional)' (https://bscscan.com). A warning message is displayed below the 'Currency Symbol' field: 'Ticker symbol verification data is currently unavailable, make sure that the symbol you have entered is correct. It will impact the conversion rates that you see for this network.'

Fill in the details below:

Network name: **Smart Chain**

New RPC URL: **https://bsc-dataseed.binance.org/**

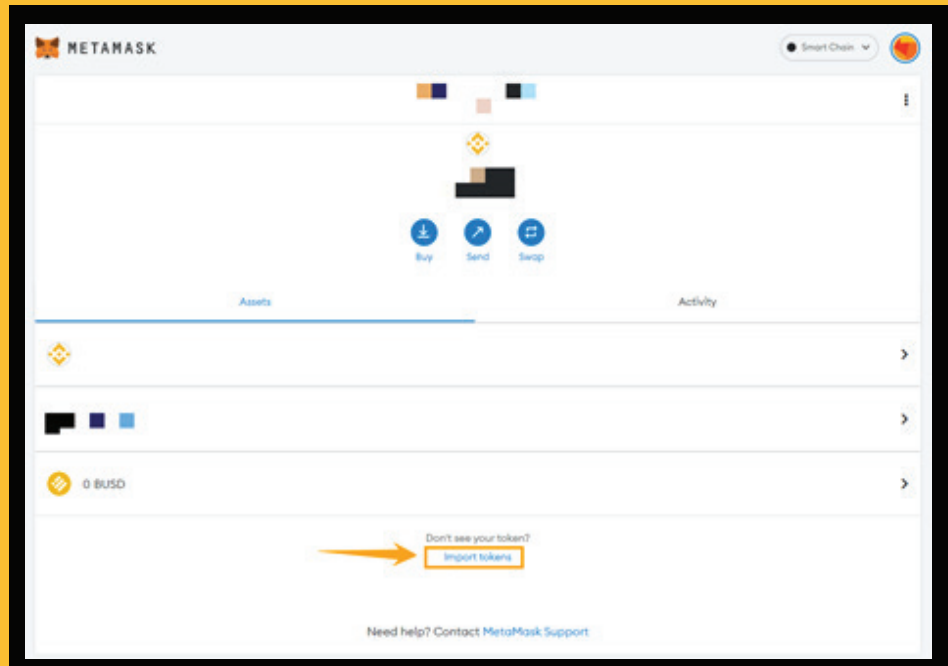

Chain ID: **56**

Currency Symbol: **BNB**

Block Explorer: **https://bscscan.com**

Step 4.

Import TFLOW Token

Select the import tokens option at the bottom of the page.

Import Tokens

Custom Token

i Anyone can create a token, including creating fake versions of existing tokens. Learn more about [scams and security risks](#).

Token Contract Address

Token Symbol
